SHRIMPS

**TECHNOLOGY AIMED AT
ACHIEVING INCREASINGLY BETTER RESULTS IN SHRIMP FARMING**

Higher digestibility

Better stability in water

Evenly-sized pellets

Better water quality

Better performance

Increasead number of pellets per kg of feed

Products formulated with the latest advances in animal nutrigenomics

- 100% ORGANIC MINERALS
- PREBIOTICS AND PROBIOTICS (MOS)
- ENZYME COMPLEX
- DOCOSAHEXAENOIC ACID (DHA)
- NUCLEOTIDES

100% extruded feed: higher number of pellets per kilo:

- EVENLY-SIZED PELLETS
- LESS LEACHING LOSSES
- FASTER GROWTH
- GUARANTEED NUTRIENTS

SHRIMPS

GUABITECH

Optimal nutrition for better development in superintensive farming systems.

Recommended for high-challenge situations in terms of water salinity and/or density. 40% crude protein.

GUABITECH ACTIVE STARTER PL 10

Indicated for shrimps at post-larvae stage from PL10 to PL15.

GUABITECH ACTIVE STARTER PL

Indicated for shrimps at post-larvae stage from PL15 to 1 g.

GUABITECH ACTIVE STARTER J

Indicated for shrimps with an average weight from 1 to 3 g.

GUABITECH ACTIVE 2,0 MM

Indicated for shrimps weighing between 3 and 6 g.

POTI

Nutrients suitable for semintensive farming systems.

Indicated for shrimps with an average weight greater than 3 g.

POTI GUAÇU 35 2,0 MM

35% crude protein.

POTI GUAÇU 30 2,0 MM

30% crude protein.
