the full range of products:
guabiaqua.com

Products developed through advanced studies on animal nutrigenomics

- PREBIOTICS AND PROBIOTICS (MOS);
- NUCLEOTIDE
- ENZYME COMPLEX;
- DHA;

100% organic minerals

- Greater bioavailability.
- Easy absorption and metabolism, optimizing the animal's performance.
- Enhances antioxidant protection for cells.
- Preserves water quality.

WHY TO CHOOSE

Guabi

NUTRITION FOR **MAXIMUM PERFORMANCE** AND **EFFICIENCY**

ALLZYME® SSF

Enzyme that maximizes feed efficiency in the diet while also reducing its environmental footprint.

Prebiotics

Indigestible ingredients that stimulate the growth and activity of certain bacteria species to help support fish health.

MYCOSORB® A+

Mycotoxin binder, offering superior binding capabilities, a broader adsorption profile and increased efficacy.

MOLD-ZAP®

Designed to inhibit mold growth, to retain dry matter and nutrients, for less top spoilage and for less dry matter loss.

Antioxidants

To ensure optimal animal performance.

GuabiTech
Maximum
performance for
great results.

Pirá Evolution
The best
cost/performance
ratio in the market.

FEED PROGRAM

| FISH WEIGHT | AFRICAN CATFISH |
|--------------|---|
| 0,15 - 2g | Guabitech Larvae Starter (powder) |
| 2 - 10g | Guabitech Fingerling Starter 1.0mm |
| 10 - 20g | Guabitech Juvenile Starter / Carnivores 1.7mm |
| 20 - 80g | Guabitech Juvenile Starter / Carnivores 2-3mm |
| 80 - 300g | Pira Evolution Carnivores 4-6mm |
| 300 - 1.000g | Pira Evolution Carnivores 6-8mm |
| > 1.000g | Pira Evolution Carnivores 9-11 mm |
